Professional Experience Details

Mathbrainius	**September 2015 to Present**

(Node.js) Full Stack Developer

Accomplishments and Responsibilities

- Oversaw development of video-based interactive math problems for middle schoolers.
- Managed other developers and used Github projects (similar to Trello) to coordinate the development process.
- Oversaw the design of the core content of the project. This included the development of many object-oriented interactive components as well as the build process, which assembles the math problems (using GruntJS, webpack, Dart Sass, etc).
- Managed all Heroku apps and pipelines as well as the Heroku continuous integration setup.
- Managed the GitHub organization and repositories.
- Managed the DNS records for the entire company using Cloudflare.

Christian Juth
Full Stack Developer

Grace Material Handling	June 2015 to August 2015

Software Automation Engineer

Accomplishments and Responsibilities

- Helped optimize sales pipeline for material handling company using Nutshell CRM API.
- Used custom Jenkins server to run automated tasks that helped manage Nutshell data.

Smarter Agent Mobile	June 2014 to April 2015

App Tester

Accomplishments and Responsibilities

- Participated in SCRUM meetings and learned how to better coordinate work with others.
- Used Selenium to implement regression testing across multiple real estate apps.
- Used Jenkins continuous integration server to run regression tests.

Readorium	June 2014 to August 2014

Front End Designer

Accomplishments and Responsibilities

- Helped improve front end design for reading comprehension web application.
- Tested and improved product cross-browser compatibility.
